We will offer the cattle in the groups that they are lotted in. We will allow the buyer to take 10 or more in the bigger groups and 5 or more in the smaller groups. This will be a gate cut unless otherwise stated.

All lots are subject to change and all announcements during the sale take precedence.

**Owners:** Brian, Tiffany, Reagan(Skow) & Mckinley Stoller Brian(308)737-6213 Tiffany(308)737-6230

We would like to welcome you to the 2<sup>nd</sup> Bear Mountain Angus genetics female sale. The purpose of this sale is to highlight the females that our customers have produced. We have purchased a lot of the females selling in this sale from our customers and have bred them to be able to offer what we feel will make excellent mama cows. A few of our customers have also consigned their home raised females to the offering. We would like to see more of our customers consign their females to this sale in the future. All of the females in the sale are very functional & complete cattle who have been developed the right way, out on stalks and grass most of their lives. They have been handpicked and we have culled for various reasons to get to the cattle being offered.

All the cattle will be video'd and available for viewing on LiveAuctions.TV. This will be a video sale and all but lots 710 & 718 will be available for viewing on sale day at the Bear Mountain sale facility. These cattle are fully guaranteed to be as we say they are. If for any reason anything is not as we say they are, please let us know and we will make it right.

Sincerely,

Brian & Tiffany Stoller

*We would like to invite you to our Annual Production sale*

**Thursday, February 22, 2018**

**Offering:** 130 Angus Bulls (Yearlings & Coming 2's)

50 Registered Females (Proven Cows, Bred heifers & Open Heifers)

# BRED HEIFERS

All of the bred heifers being offered have been handpicked for quality and we feel that they should make excellent mama cows. They will all be on display at Bear Mountain starting Friday, December 15<sup>th</sup>.

They have been Bangs vaccinated and should be able to go out of state if needed.

As weaned calves they received 2 shots of a modified live 5 way vaccine with Vibrio & Lepto along with a 7 way shot.

They were pregnancy checked with ultrasound in July so the AI bred heifers could be differentiated from heifers bred to the herd bulls and a more accurate calving date could be determined. They were preg checked again the end of November & first of December to insure that they were still pregnant .

At the fall preg check time they were poured with a dewormer and given a scour vaccine. The only thing they need is a booster of scour vaccine.
